

Subsonic hollow

- **Super accurate and one of the quietist subsonic rounds on the market.**
- Subsonic Hollow is a lower velocity hunting cartridge with target shooting accuracy. Lower velocity by comparison to other hunting rounds affords a much reduced muzzle report.
- This Subsonic product has been developed with a non-greasy special lubricant (minimum dry lube) for more dependable operation in semi automatics and improved functioning in all weather conditions.
- Subsonic Hollow has an innovative bullet and hollow profile providing unequalled bullet expansion and stopping power. Market leading expansion characteristics deliver short travel as the bullet expands.

.22 ELEY Subsonic

Non- greasy lubricant for improved functioning in all weathers and weapons

Precise functioning from our paraffin wax lubricant

Consistent performance - time after time

ELEY's legendary accuracy performance coupled with high-technology case manufacture, priming and assembly – nothing left to chance.

Greatly improved stopping power

Innovating bullet and hollow profile provide unequalled bullet expansion and stopping power. Market leading expansion characteristics deliver shorter travel as the bullet expands.

40-grain bullet

Increase velocity to accepted performance levels minimises sight adjustments

All examples were shot under the same conditions
